

# Download File PDF From Tb To Aids

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

**What you need to know about tuberculosis and HIV/AIDS** 

Tuberculosis (TB) and HIV/AIDS are the world's two deadliest infectious diseases. TB is the main cause of death among people living with HIV. This death toll is unnecessary, because with timely diagnosis and treatment most people living with HIV can be fully cured of tuberculosis.

**How many people die each year, worldwide?**

Disease	Deaths per year
Tuberculosis	1.7 million deaths
HIV/AIDS	1.0 million deaths
Co-infection	400,000 deaths

**Why are people living with HIV more likely to fall ill with tuberculosis disease?**

People living with HIV have a **20 to 30 times higher risk** of developing tuberculosis disease, because HIV lowers the immunity to infections. The increasing coverage of ART and preventive TB treatment reduces this risk significantly.

**How can we save more lives?**

- Treat immediately**  
Treat all patients with HIV infection and tuberculosis disease immediately for both diseases to maximize their chances of quick recovery and cure from TB and other HIV related illnesses.
- Treat preventively**  
Preventively treat all people living with HIV who are infected with TB (but not yet ill from TB disease) so that they do not develop TB disease.
- An integrated health system**  
Provide care for both diseases in one integrated system: Two diseases, one patient, one caregiver.

Our mission: The global elimination of TB through the development and implementation of effective, efficient and sustainable TB control strategies. KNCV Tuberculosis Foundation - www.kncvfb.org
