#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

In this virtual lab, you will use coffee cup calorimetry to determine the specific heat, c , of a metal.

Heating the metal

Imagine that, in lab, you record the mass of a piece of metal, m_{metal} , as

$$m_{\text{metal}} = 45.00 \text{ g}$$

In the next step of the lab (as shown in the animation to the left) you heat up the piece of metal.

Play the animation, and record the metal's highest temperature, T_{hot} .

$T_{\text{hot}} =$ °C

Reset Begin
